Talking on an aviation radio and understanding air traffic control instructions can be one of the most intimidating aspects of flight training. A full-color sectional excerpt, in an attached fold-out format, is provided for the example flights so readers can review the map while reading the explanation for flying and talking in each area. Readers will learn everything they need to communicate effectively in VFR, IFR, and emergency conditions. The example foldout sectional chart is in full color and is also used for example flights discussed throughout the book. Bob Gardner s conversational-yet-concise writing style in his approach to aviation communications will help increase your comfort level when using an aircraft radio. The book features talk examples of typical radio transmissions that explain how the air traffic control system works, as well as present simulated flights that clearly demonstrate correct communication procedures in each class of airspace.
